| Gaming

| At a Glance.

Indium Software is a fast-growing Digital Engineering company, focused on building modern solutions across Applications, Data, and Gaming for its clients.

Over the past two decades, Indium has built deep relationships with Fortune 500, Global 2000, as well as born-digital companies across industries such as BFSI, Healthcare, Manufacturing & Retail, and Digital Native & Tech – in North America, India, Europe, and APAC. It has also built strong partnerships with leading hyperscalars, low-code, and data partners such as AWS, Azure, GCP, Mendix, Striim, and Databricks.

Indium has about 3,000 associates globally and is widely known for its meritocratic workplace culture and continuous learning through its in-house learning center, Indium Academy, earning it the coveted recognition of a Great Place To Work™.

Digital Engineering Services

Deep expertise in next-gen offerings
combining data and applications

Digital Accelerators

Indium's **AI powered Accelerator**, which automates the text analytics lifecycle by leveraging ML, NLP, and Gen AI, from any data source without manual intervention. Available as an On-Prem, Cloud or Hybrid deployment model.

uphoriX is Indium's **all-in-one smart test automation** platform for your functional, regression, performance, security and compatibility testing needs.

Indium's **Prebuilt Accelerator** for Databricks implementation lifecycle, including Analytics, Cloud Automation & Optimization, Data Assurance, DataOps, MLOps and Data Governance.

Indium's **Data Assurance Framework**, is an all-inclusive solution that accelerates validation of heterogeneous target and source datasets for Data Quality, Completeness, Integrity and Consistency.

Indium's INTACT provides accelerators around Striim version upgrades, automated deployments and quality assurance framework for various phases of the Striim implementation journey.

Indium's comprehensive set of migration accelerators to enable 3x faster migration and deployment to Snowflake.

Indium's BPM Nitro comes with 400+ pre-built functional integrations with Camunda, eliminating manual coding and errors.
